

Brief Description of Drawings

I am submitting 8 rough drawings on my ideas of my invention “Recreational Tote”, they are not to scale, they are to show the concepts of the variety of ways this all-in-one unit can be built.

Page one, drawing one, shows the outside of a cooler with a 3-inch drawer built on the bottom of the box.

Page two, drawing two, shows the inside of a cooler liner.

Page three, drawing three, top view, shows a drawing of a flat top that can be used on “Recreational Tote”, bottom view of drawing three shows the front view of a flat top “Recreational Tote” with a compartment that locks.

Page three, drawing four top view, is of a rounded top to be used on “Recreational Tote”, bottom view of drawing four, shows the front view of a rounded top “Recreational Tote” with a compartment that locks.

Page four, drawing five, shows a tackle box drawer, with a locked entry, & the different compartment in it.

Page five show a drawing of a “Recreational Tote” with a tackle box built into a flat top cooler.

Page six, shows a drawing of a flat top “Recreational Tote” with a tackle box built into the top of the unit, & 2 drawers to the right of the cooler unit, one with a locking mechanism.

Page seven, top view, shows a front view of a rounded top cooler with a 3 ½ inch locked drawer kit added to the bottom of any bought off the shelf unit. Bottom view shows inside compartments of locked drawer.

Page eight, top view, shows the “Junior Recreational Tote” front view, with flattop & locked drawer compartment, also view of compartments in drawer. Page eight, bottom view, shows a “Recreational Tote” front view with cooler on top, locked drawer on bottom, and also a view of the compartments in the locked drawer.

Also I am enclosing some pictures of some units I made up, they are not professionally made, but you can get a rough idea of the “Recreational Tote” & it’s many functions.

Brief Summary of The Invention

The “Recreational Tote” is an all in one unit; that contains, a cooler, tackle, bait, & lock box. It provides a cooler for beverages, foods & bait, also a place for your catch. It has the convenience of a tackle box built in, plus a locking compartment to store important papers, like driver & fishing license, your car keys, or jewelry. Instead of lugging several separate containers with you, you have the built in convenience of several containers in one unit, which makes for better manageability & convenience. It has a variety of compartments that will adapt to varied needs. It is ruggedly constructed, easy to maintain & clean, & its portability makes it a good choice to use for any outing.

Also any cooler from the smallest to the largest can easily be converted to an all-in-one “Recreational Tote” with a kit I have devised, which will fit the inside or outside of the cooler of your choice.

one in my car at all times, so if the notion hits me to go fishing, I'm ready to go in no time at all, I just stop & ice up, get some food & drinks, & I'm ready to go. It's not only handy for fishing & outings, but can be used for a variety of needs. It's nice looking, not at all bulky, & you can even sit on it while you fish, picnic, etc.

Another feature of this "Recreational Tote" is I've devised a kit that can be added to any cooler, from the largest to the smallest to be converted easily into a "Recreational Tote".
